

**ABSTRACT**

A skid-steer mini-loader (10) has a pair of wheels (12) on each side thereof, and a pair of tracks (15) each mounted on the wheels (12) on a respective side of the mini-loader. Each track (15) is the tread section of a tire  
5 which has had its side walls removed. The mini-loader also has a guide disk (16) mounted on at least one side of each of the wheels (12), each disk (16) being located adjacent an associated edge of the track (15) on the respective side of the mini-loader.
